## DOORTEX® ultimat®

The ultimate dust and moisture control mat.  
Produced from a combination of 70% micro fibre and 30% ultra strong polypropylene scraper fibres.

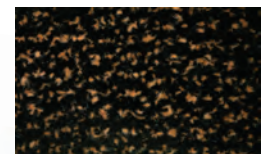

Excellent water absorption equate to a huge 2 litres per m².  
The polypropylene fibre content acts as tiny brushes to remove dirt and dust while adding greater strength and life length to the mat.

Combined pile weight of 800 grams/m² demonstrated the high quality construction.  
Fully machine washable for convenient maintenance (to 30°C)  
Smooth vinyl / rubber mix backing for additional stability.

## Doortex Anti-Fatigue Mats - strain busting muscle relief

Standing for long periods of time on hard floor surfaces is very uncomfortable and causes physical fatigue. Leg muscles become totally static and blood flow is greatly reduced causing pain and discomfort.

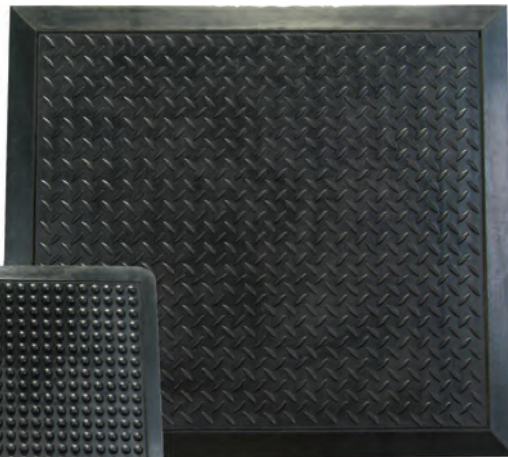

However, standing on an anti-fatigue mat, muscles will subtly contract and expand as they adjust to the flexibility of the mat. This increases blood-flow and the amount of oxygen reaching the heart, greatly reducing fatigue.

Our range provides both fixed and modular ergonomic solutions for industrial applications and is a perfect accompaniment to the growing stand up desking market.

Reduces strain and injury while increasing productivity !

### BUBBLE & RIPPLE MATS

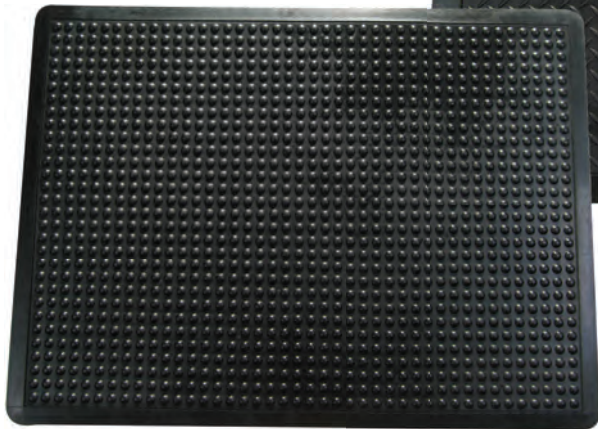

Ripple

Cushioned floor mats for added foot comfort and reduced fatigue. Air pockets under the sealed surface take the strain off ankles, leg and back muscles.

Provides relief from fatigue during prolonged standing for increasing productivity and morale.

100% Rubber. 14mm thickness.

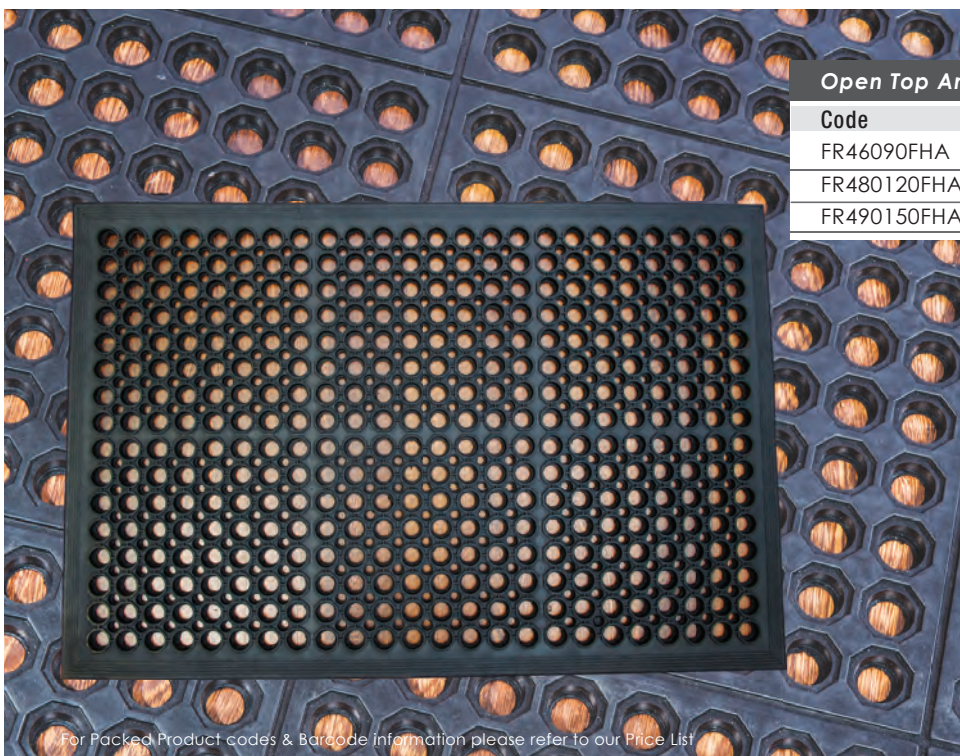

Bubble

Open top anti-fatigue matting for effective ergonomic benefits in standing work environments.

The construction facilitates quick removal of fluids or debris to prevent the surface from becoming slippery.

Ramped edging provides a bevel that reduces the risk of tripping.

Easy to maintain. 100% Rubber.

Modular Anti-Fatigue System

A modular matting system to offer anti-fatigue ergonomic benefits over larger areas.  
The 90cm x 90cm mats can be linked to form extended lengths or widths to suit specific application areas.

The open top construction facilitates quick drainage of fluids to keep the surface from becoming slippery while providing effective anti-fatigue properties.

Easy to assemble, disassemble and maintain.

Ramped edging provides a bevelled finish to reduce trip risk.

Mat supplied with 4 removable ramped edge strips.
