

CHAIRMATS FOR HARD FLOORS

SMOOTHLY DOES IT

HARD FLOOR

Our standard smooth backed mats will protect your hard floors whether they are wooden, laminate, tiles or concrete without marks or damage. Our anti-slip mats feature a very low tack backing which is perfect for polished surfaces and will also leave no marks.

HF **Hard Floors** - Natural wood, laminate, tiles, concrete and vinyl.

CT **Carpet Tiles**

we innovate, others follow

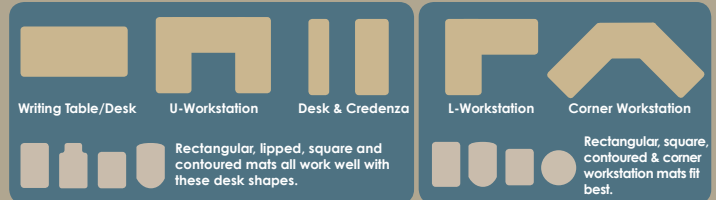

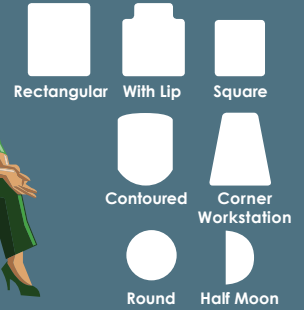

SHAPE UP

FIND THE SHAPE OF YOUR WORKSPACE AND MATCH IT TO THE RIGHT STYLE...

There's a wide range of shapes to suit any space, from the basic to the aesthetic.

Before you choose your shape consider your chair's roll area. Do you sit still or move from a desk to a file?

Determine the furthest points you roll to retrieve items and then pick a size and shape that will cover these dimensions.

Writing Table/Desk U-Workstation Desk & Credenza L-Workstation Corner Workstation

Rectangular, lipped, square and contoured mats all work well with these desk shapes.

Rectangular, square, contoured & corner workstation mats fit best.
