

unomat

The only Anti-Slip Polycarbonate Chair Mat that is fully adaptable for all types of hard floors and very low pile carpets.

**NEW AND IMPROVED!
THE ULTIMATE
SLIP-RESISTANT
CHAIR MAT
SOLUTION!**

Now supplied with our specifically designed Slip-Resistant Pads that add incredible stability on all hard floors and low pile carpets and carpet tiles where traditional grippers fail to penetrate. Fantastic anti-slip performance and a super versatile Chair Mat solution!

Made from original Floortex® polycarbonate. Our Unomat is incredibly tough and durable with twice the impact strength of vinyl mats.

Unomat provides a perfectly flat and rigid surface for an 'easy glide' movement of caster-based chairs that helps to reduce leg fatigue and lower back strain.

Unomats will not sink, crack, curl, cup, discolor or smell.

High clarity allows your flooring to show through for an attractive and highly effective addition to your office or home environment.

Compatible with under floor heating systems.

Each Unomat is supplied with a pack of our new, specifically designed Slip-Resistant Pads.

These provide incredible anti-slip performance that is far superior to mats with an 'anti-slip' coating.

As all floors differ the number of pads needed to significantly reduce slip may also be different from floor to floor, but our versatile solution will have everything covered.

In most cases one pad applied in each corner of your Chair Mat should be sufficient to provide substantial slip resistance!

Easy to apply, position and remove, our Slip-Resistant Pads give you the versatile option to suit your particular needs.

And there are 45 Pads in each pack!

Perfect for all types of flooring: ceramic and porcelain tiles, lacquered or varnished wooden floors, polished stone, vinyl and very low/no pile carpets.

Our unique pads will work on them all and will not affect or damage lacquered flooring.

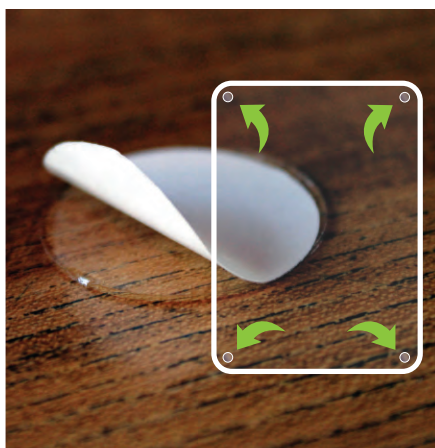

Using our Slip-Resistant Pad technique also means that your Unomat is 100% recyclable, unlike mats that have an 'anti-slip' coating.

Environmentally safe and free from Phthalates, PVC, tin, lead and cadmium.

An ideal choice for people with allergies

Each Unomat is eco-friendly manufactured, with 50% of our manufacturing site's energy coming from on-site and external renewable sources.

And all with a Limited Lifetime Warranty!
