

2023 sees the launch of our ground-braking new Marlon BioPlus chair mat range produced from bio-based polycarbonate!

**Coming soon!**

**CLEARTEX**<sup>®</sup>  
**Marlon BioPlus**

**Bio-based reduced carbon polycarbonate**

All the benefits of our world beating high performance Floortex Original Polycarbonate chair mats, but with added eco-friendly features and responsible green manufacturing.

- Manufactured in the UK from Marlon BioPlus Polycarbonate for premium performance and durability.
- With double the impact strength of PVC, BioPlus polycarbonate provides excellent long term protection for flooring from wear and permanent damage caused by chair casters.
- Provides an ergonomic easy glide surface for smooth movement of caster based chairs, to help reduce leg and lower back fatigue.
- Guaranteed not to sink, crack, curl, cup, discolor or smell under normal use and correct application.
- High clarity BioPlus formulation allows the beauty of your flooring to shine through.
- Odorless and completely free of any toxic chemicals with minimal gas emissions.
- Compatible with under floor heating systems.
- Limited Lifetime Warranty.

To ensure our Marlon BioPlus chair mats have the best eco-friendly credentials, every mat has been carefully manufactured using a 'Mass Balancing' production process that is certified by the ICSS. ( *International Sustainability & Carbon Certification* )

This process includes the following eco-friendly production features:

**100%**

Renewable energy used in chair mat production

Floortex BioPlus chair mats are manufactured in the UK using 100% Renewable Energy, including solar and wind power.

**100%**

Reduction in carbon emissions during bio-resin production

The polycarbonate resin is now climate neutral, representing a 100% reduction in carbon emissions.

**89%**

Replacement of fossil based raw material

Non-fossil based bio-circular material, such as used cooking oil, is used in production.

Every chair mat is carefully produced using a Mass Balancing bio-circular process - with both the resin and the mat manufacture being ISCC Certified.

Bio-Circular attributed resin

Retaining all the high performance qualities of Floortex<sup>®</sup> Original Polycarbonate, this state-of-the-art eco-friendly range is manufactured using an 89% non-fossil based bio-circular material and 100% renewable energy.

The polycarbonate resin is now climate neutral, representing a massive 100% reduction in carbon emissions.

*The ultimate in chair mat performance combined with outstanding certified green credentials*
